What the penalties mean

The dollar amounts below are the most each law allows. We haven't found a published penalty under any of these four laws yet. The more immediate risk is usually commercial: in Minnesota and Connecticut the law lets the state stop stores from selling an unreported product.

THE DUTY

Minn. Stat. 116.943, subd. 2(a)

“...a manufacturer of a product sold, offered for sale, or distributed in the state that contains intentionally added PFAS must submit to the commissioner information that includes...”

The statute set January 1, 2026. Minnesota moved the first deadline to September 15, 2026.

If you don't file

Up to \$25,000

per penalty order from the state agency

Minn. Stat. 116.072, subd. 2(a)

Up to \$15,000 a day

if the state takes it to court

Minn. Stat. 115.071, subd. 3

30 days

to hand over lab test results if the agency asks

Minn. Stat. 116.943, subd. 4(a)

Off the shelf

stores notified about an unreported product can't sell it

Minn. Stat. 116.943, subd. 2(d)

THE PENALTY

Minn. Stat. 116.072, subd. 2(a)

“The commissioner or county board may issue orders assessing penalties up to \$25,000 for violations identified during an inspection or other compliance review.”

The same law generally forgives a penalty once the violation is corrected, unless it's repeated or serious (subd. 5). Filing late but promptly is far better than not filing.
